Survey Methodology

Survey by JUST Capital. Methodology: Conducted by The Harris Poll, April 29–May 3, 2021 and based on 2,061 online interviews. Sample: U.S. adults ages 18 and older.

Respondents are selected among those who have agreed to participate in The Harris Poll surveys. The data is weighted to reflect the composition of the adult population. Results are weighted for age within gender, region, race/ethnicity, household income, education, employment, marital status, and size of household where necessary to align them with their actual proportions in the population. Propensity score weighting is also used to adjust for respondents' propensity to be online.

This online survey is not based on a probability sample and therefore, is not representative of America. The results represent only the views of the sample and no estimates of theoretical sampling error can be calculated.
